

Multi-Function Clamp System Model SEEM

USED ON 1.56" (40 mm) CENTER DISTANCE GRIDPLATES

Kurt fixtured monoblock clamp system works with all gridplates with M10 / M12 / M14 and M18 for "T" nuts per DIN 508. The clamp system is mounted through open construction with clamping actuation from top.

MULTI-FUNCTION CLAMP SYSTEM FEATURES:

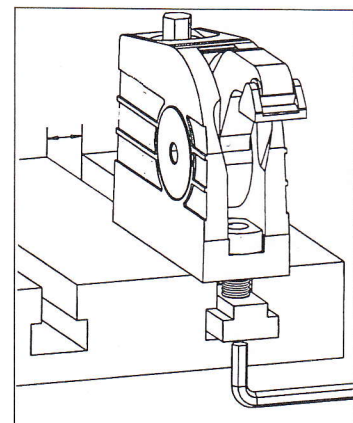

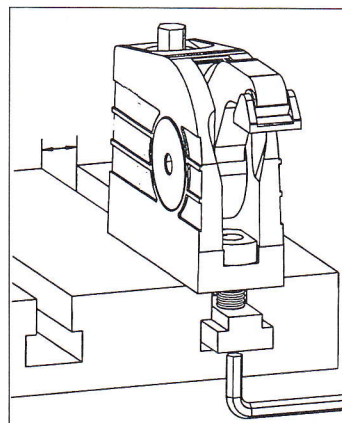

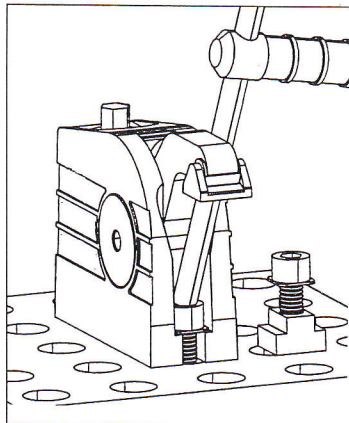

- More clamp pressure than similar products
- More applications than other systems
- Allows upside down clamping

T-Nut through closed construction adjusts in table free sliding condition. Position fixation occurs simultaneous with clamp operation. T-Slot width from .39" (10 mm) through 1.56" (40 mm) using T-Nuts C' bored to fasten unit from bottom with socket screw and tapped key inside the clamp unit.
